BUILDING PLOT CLOSE TO THE SEA IN TROGIR RIVIERA

This building land located in the town of Marina in the vicinity of Trogir and an international airport features a beautiful sea view. A pebble beach featuring a bar is located just 300 meters from the plot, while supermarkets, restaurants and other useful facilities are located a kilometer away. Total area of 2,460 square meters makes this land ideal for building a modern villa with a spacious garden, overlooking the cove. This area is extremely popular due to close proximity to the airport and a yacht marina located in the very town of Marina. Pine trees and other Mediterranean foliage are scattered across the land. These elements might work extremely well with the construction plan for the villa. The land has a direct access road and all facilities are located nearby.
